Coin Counting and Packaging Machines

Magner 900 Series

The Model 920 counts a single coin denomination at 1700 coins per minute and produces either coin rolls or bagged coin output. The unit offers operator adjustable precise bag stops, simple adjustment for denomination change over, and small coin off-sort for non-stop processing. At only 15 pounds this product is both highly portable and extremely reliable.

The Model 930 offers the same high processing speed as the 920, but adds an automatic feed system with a large hopper capacity for enhanced throughput in higher volume packaging and verification applications.

Customers worldwide are assured of ongoing support for all Magner products through our network of Authorized Distributors and our Direct Technical Support Team (TST).
